

# 2007

european auto injectors technology  
innovation award

## **ACIST Medical Inc.**

*Frost & Sullivan recognizes ACIST Medical Inc. with the “2007 European Auto Injectors Technology Innovation Award,” for its development and introduction of innovative products. The company strives to make cardiac imaging more efficient with hi-tech injector systems, compatible with the major imaging vendors. This offers an efficient reporting system and optimized workflow for the quick diagnosis of a condition. ACIST has repeatedly proven that it is extremely committed to provide the best technology for its customers, by continuously improving their product range, showing high product penetration, value additions and clear distinction from competitors. Understanding customers is the prime reason for ACIST’s success in providing the best technology configuration, with the most benefit for clinical application. ACIST Medical Inc. is a part of Bracco AMT the Advanced Medical Technology subsidiary for Bracco Group, Milan, Italy.*

**Frost & Sullivan**

*“This award from Frost & Sullivan is quite an honor. It further validates ACIST’s focus on innovation especially innovation developed with the purpose of making things better and easier for physicians and their patients around the world. We believe this award demonstrates our commitment to continuous innovation. The ACIST CVi system is a fourth-generation product developed as part of a continuing effort to address unmet customer needs. We look forward to ACIST having even more significant innovations in variable-rate contrast delivery coming to market in the near future.”*

**Fulvio Renoldi Bracco, CEO of ACIST.**
